

On 30/5/2020, the West Bengal Branch of API organized its **first-ever online clinical meeting**. This was organized via a video calling app. Dr Rudrajit Paul, Dr Santa Subhra Chatterjee and Prof. Shibendu Ghosh, presented three cases respectively. The online session was virtually attended by more than forty physicians from various parts of the state. Since social distancing will be in vogue for the foreseeable future, this type of clinical meeting will become the new normal.
